

Title:

Word Rain

Data & Visualization

Data: Pride and Prejudice (txt file)

- ➔ Select word that start with 'a'
- ➔ Count the number of each word

Visualization: The size of each raindrop refers to the number of each word

When users catch the raindrop, the raindrop disappears, and the word appears under the screen.

User Interaction

Users can control the size of the catcher

(working) Users would be able to select the starting letters of words

(working) Users would be able to choose the position of the words: above the raindrop/bottom of the screen
